Projects

1. **Social Media App** (*Express.js, MongoDB, TypeScript*): A backend social media platform built as training for backend development. Implemented authentication, post creation, commenting, file attachments, and reaction features (add/update). Architected the app using Repository design patterns, including an **Abstract Repository** for clean, scalable structure.
 2. **Movie Flex app** (*React native, expo, TypeScript*): discover popular movies, view trending searches, and manage their saved movies — all with smooth infinite scrolling and efficient data fetching.
 3. **Flower E-commerce App** (*Next.js, TypeScript*): E-commerce platform with authentication (NextAuth), form validation, React Query, infinite scroll, multilingual support (Next-Intl), and admin dashboard.
 4. **Fresh Cart** (*React, Vite, JS*): Full e-commerce experience with Stripe payments, wishlist, authentication, and Context API state management.
